

Task 2, Team Collaboration

Document two or three collaboration scenarios/situations (argumentation, discussion, conflict, or whatever you want to call it) that have happened in the team assignment in the course BTH003. You can freely select any scenario, but it should be of specific interest for you.

Use Browns et al. **guidelines/instructions** for describing the events.

1. Describe the scenario. What happened? Did you try to solve it? What was the final outcome of the scenario? Relate your scenario pattern to the general patterns described by Brown.
2. What traits are there in your patterns? Relate it to **Browns list of traits** – did anyone of the traits listed in Browns book appear among the team members in your scenario? Did you handle any trait in your scenario? Describe how and relate it to Browns recommendations.
3. Did you resolve the collaboration scenario? How? Relate the resolution to the applicable resolution patterns, behaviours, (usually several) described in Browns book.
4. Describe **at least three alternative resolutions**, pattern of behaviour, in addition to the resolution in 3 above, that could be used in order to handle the scenario. Select behaviours from Browns book.

Reporting: A written **report of approximately three pages** shall be handed in to the supervisor. Language used shall be English.
